Summary

Computer Science undergraduate focused on frontend and interactive 3D web development. Build web interfaces with React, Next.js, Three.js and GSAP, and computer vision applications with Python. Seeking a frontend development internship.

Skills

Languages: JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Redux, Zustand | **3D and animation:** Three.js, GSAP

AI and computer vision: MediaPipe, OpenCV, Streamlit, Groq API

APIs and tools: REST APIs, Git, GitHub, VS Code, Android Studio, Termux, Vercel

Experience

Horizon TechX | Frontend Development Internship | Completed

- Built and deployed Frames, an image gallery with a lightbox and responsive layouts, as an internship project.

SecureRegent | Frontend Internship | Completed

Projects

EstateVision 3D

HTML5, CSS3, JavaScript, Three.js, GSAP, Vercel

- Built a real estate landing page with 360-degree GLTF model walkthroughs, 3D hotspots and camera zoom transitions using vanilla JavaScript.
- Created responsive layouts with glass-style cards, a WebGL cursor glow and 3D card-tilt effects.
- Added client-side property filters and a mortgage EMI calculator with real-time results and an animated slider.

AI Gym Coach

Python, Streamlit, MediaPipe, OpenCV, Groq API | Smart India Hackathon 2026

- Developed a workout web app that detects body pose with MediaPipe and OpenCV and gives real-time posture feedback.
- Connected the Groq API to provide personalized AI coaching recommendations.
- Built and deployed the app as a presentation project for Smart India Hackathon 2026.

Education

Tula's Institute, Dehradun

Bachelor of Technology in Computer Science and Engineering (Core) | 2025-2029

CGPA: 8.40 (First Year)

Activities

QHackathon 2026 participant | Tula's Institute, Dehradun | May 2026

AWS Student Builders Group core team applicant | Tula's Institute | August 2026
